Ultra-Lightweight Headset-Mic

(Model: H9975; P/N: 41093G-01)

Compatible with all Series 9900 Wireless Belt Stations

Product Bulletin

The H9975 Ultra-Lightweight Headset-Mic is designed as a user interface for the Series 9900 Wireless Belt Stations in low-noise environments. It provides a comfortable alternative to noise-attenuating headsets, and is suitable for use under hard-hats or protective headgear, with hazmat gear, or simply by itself for comfort and convenience. The H9975 is a rugged, reliable headset which delivers clear and dependable communications for mission-critical applications.

KEY FEATURES

- Dynamic microphone with full flex boom assembly for perfect microphone placement
- 36" straight cord, with military-grade twist-lock connector for 9900 Series Belt Stations
- Dynamic earphone on pivot mount
- Moldable ear hangar frame design
- Oil/UV-resistant rubber headband adjustment
- Rear cable entry maintains proper balance for a firm fit
- In-line, water-tight volume control in low-profile enclosure
- Durable construction, reliable performance
